IT TAKES A TRAVELER TO BUILD A TRAVEL TRAILER

Imagination is a great thing ... but it takes a lot more than dreaming to build a trailer that will meet all the rigorous tests of actual travel—in ease of towing, safety, comfort and durability. Airstream has pioneered lightweight travel trailers since 1932, and travel tested them under all conditions in practically every corner of the globe. We have conducted numerous caravan tours to Mexico, Central America, Canada, Europe. We have lived for months on end with trailer travelers, and found out what they want in a travel trailer ... and after each trip, we have come back and incorporated these new features into every Airstream.

I, personally, have trailered in most of North America and Europe for over 20 years—but this is only part of the story. The key men who are actually responsible for designing and building Airstreams at our two factories are likewise experienced trailer travelers. Both Andy Charles at Jackson Center, Ohio, and Art Costello at Los Angeles, Calif. have, only a short time ago, returned from our last Mexican Caravan ... and they are hard at it now, building new Airstream models with every latest feature learned from our recent experience.

What does this mean to you? Simply this—if you want to travel in a trailer; if you want long years of trouble-free service and satisfaction—depend on the trailer built by experienced trailer travelers. It is your guarantee that you will get the greatest value for your money. Take my word for it. This is my way of life—and there is little more important to me than a happy trailer traveler.

The new Airstream models are really terrific. So get in touch with Andy Charles or Art Costello and see for yourself.

Wally Byam
AIRSTREAM TRAILERS INC.
everything you want in a great big travel trailer—
top AIRSTREAM quality at a special new low price

Here is an outstanding "buy" in travel trailers. A genuine Airstream with famous lifetime construction at a new low, low price! We've taken the newest and best of our custom-built features and incorporated them into this great new 26-ft. Overlander. Then, we've standardized on this one arrangement to give you substantial savings without sacrificing quality or convenience. Please note, therefore, no modifications are possible except for stated permissible extras.*

The Airstream Overlander is designed and built by travelers...to travel! Nothing has been left out—much has been added. It boasts a spectacular large new dry-floor bathroom, with separate shower and toilet. Rear wardrobe convenient to bath. Handy sliding door for privacy. Practical galley with larger work areas and eye-level combination ice-electric refrigerator. Regularly sleeps four on roomy, comfortable beds...everything you need for unequalled convenience and comfort. Truly, a luxuriously livable "standard" Airstream that makes all travel fun, exciting and easy. See it at your dealers today!

Write for our new, colorful 20-page catalog—it's free!

*PERMISSIBLE EXTRA FEATURES
AT ADDITIONAL COST

- gas lights
- pump and water tank
- bunk over beds

ALWAYS THESE FAMOUS AIRSTREAM FEATURES:

• all-metal, all-aluminum construction
• all-riveted body
• all-steel undercarriage
• all-over Aero-core fiberglass insulation
• "see-thru" rear vision
• vibration-proof fastenings
ATOM
BOMB
TEST

by Edward L. Wilson
Managing Director Mobile Homes Manufacturers Assn.

ABOUT THE PICTURES

On the opposite page is a picture (courtesy of United Press) showing the atomic fireball of Operation Cue spreading across the desert floor and reaching toward Survival Town. Three of the houses used in the test can be seen as very small images at lower right. Other installations can be seen as small dots along the base of the fireball. This photo was made from a distance of 7.5 miles with a 36 inch lens. Exposure was 1/500 second at F-16.

At right is seen the row of mobile homes stationed at 10,500 feet from the blast center, just before the bomb was touched off.

Left, center, is the same row of mobile homes and travel trailers. Two of the smaller units in this line, at 10,500 feet, were tipped over by the blast. Note their position; it is obvious they were tipped over, but did not roll. The small units that did tip were broadside and at a 45 degree angle to the blast, which came from the right.

Below, right, is the interior of a mobile home after the blast. This trailer was parked in the 10,500 foot line. Except for a few glass splinters, an overturned chair, and a dislodged ceiling fixture, the peaceful scene before the blast was almost the same after the big bomb was detonated.

At the left hand bottom of the page is shown the mobile homes that were tipped over, 10,500 feet from the blast center, and one a good 15,000 feet away.

Behind them they left nineteen units, including a cabana type aluminum structure, the whole valued at almost $75,000. These were just a part of the offering to the Great Bomb, for along with them were hundreds of thousands of dollars worth of permanent type homes, buildings, electronic equipment, machinery, foodstuffs, refrigeration equipment, and specially designed bomb shelters.

And of course soldiers and newsmen, part of the experiment, huddled in trenches or crowded in tanks a few hundred yards from the mighty weapon.

Almost two years ago the Federal Civil Defense Administration called upon the mobile home industry to form a cooperative committee and work on the test program to be officially designated "Operation Cue." The FCDA explained that in order to conduct such a program all industries were donating material and man-power.

The program was presented to the boards of directors of Mobile Homes Manufacturers Association, Mobile Dealers National Association, and the Trailer Coach Association. All agreed to the program.

An industry steering committee was formed, and later a technical sub-committee went to work. Their job was to set up the units and later evaluating possible damage.

Mobile homes were to be placed some distance from the bomb, about the distance that suburban areas of a major city are from the center of the city. Individual units were placed at various angles to the point of blast to determine effects. Some had full sides exposed directly to the blast; some ends; and some corners.

The project committee was advised it could enter the blast area as soon as possible after the blast—possibly a matter of minutes or hours, and start its evaluation of possible damage.

Within three hours members were checking the mobile homes and found things about as they expected. The official government report, issued following the blast, agreed with their findings.

In the first area, according to government observers, two of the smaller units were tipped over, but five others remained upright. Some exterior walls were slightly dished in and most windows broken. Most glass from windows fell outside but, in the case of picture windows, glass was blown inward except where the insides were protected by venetian blinds. Upset furniture made interior scenes disorderly.

At the 15,000 foot line some windows were broken, but none of the units were overturned.

Industry officials were satisfied that the test proved their point. Mobile dwellings, usually located on the perimeter of major cities, provide not only comparatively safe habitation during possible air attack, but also offer great value for emergency housing.

Media Hill, Yucca Flats, Nevada. The home industry offered up, with great difficulty, a sacrifice to the Great Bomb. We say with great difficulty because the test bomb, planned for April, was actually exploded in May, after a wait of many days.

Industry observers, stationed high on Media hill, were almost frozen to death. Many were discouraged long before the
The Wally Byam Caravan this month is off on another grand tour, this time to Eastern Canada. Thanks to arrangements with the Canadian Tourist Bureau and the usual trail-blazing by Wally Byam’s scouts, the present Caravan promises to be a real Fifth Avenue tour abroad—but at Woolworth prices.

Starting at Sault St. Marie, Michigan, at the end of June, the Caravanners’ itinerary includes Ottawa, Ontario, July 1-8; Quebec City, July 9-15; Gaspe Peninsula, July 15-19; Newcastle, New Brunswick, July 20-26, Moncton, New Brunswick, July 27-August 4; Lunenburg, Nova Scotia, August 5-13; and ending at Bangor, Maine, about August 15.

Lucky seems to be with Wally Byam’s Caravan as usual—the trailerists will be able to join in some of Canada’s most colorful and important national celebrations, and the Canadian government is rolling out the red carpet for the wheeled visitors from south of the border.

This year is the 100th anniversary of the Soo Canal, busiest canal of its kind in the world, which has meant a great deal to the United States, making the ore available to steel mills in American industrial regions. The event marks a milestone in U.S.-Canadian relations—so the Caravan’s participation in it is most appropriate. Secondly, Canada is observing the 200th anniversary of the expulsion of the Acadians, made famous by Longfellow’s poem, “Evangeline.” The Acadians have since greatly increased in population, and the Canadian government is able to join in some of Canada’s most colorful and important national celebrations, and the Canadian government is rolling out the red carpet for the wheeled visitors from south of the border.

Members of the group will find some of the best fishing of their lives in Nova Scotia and big fishing derbies are on the Caravan’s schedule, along with lobster bakes, a whaling schooner trip and other attractions. Quebec is having some important religious festivals this year, too, and the Caravan will reach that city in time to join in.

Best news of all for many veteran Caravanners on this trip is the fact that the roads and bridges have all been found so good that for once the Caravan is able to dispense with its customary tow truck.

DEL MAR LIKED ROY

All of us on the Del Mar Rally Committee want to express to your Mr. Roy Morrison a thank you for a splendid show given on Sunday evening of the trailer rally. His slides and interesting narration brought down the house. I have never seen a more interested audience or heard more favorable comment after a picture showing. Mr. Morrison kept the audience while longer an eager voice from the audience was heard to say “take all the time you need”. This was the opinion of the entire group.

R. A. MacDonell in behalf of rally committee

NEW ROLLOHOME

Rollohome’s new 41’, two bedroom Dreamhome offers a 10½’ livingroom with 5 picture windows. Center bedroom features cross island bed; arrangement of criss-cross bunk beds in rear bedroom is unusual and notably practical.

Walk - through bathroom, generous closet and chest space, truly fine appliances, fixtures and furnishings combine to make this newest Rollohome a worthy addition to a noteworthy line.
WALLY BYAM CARAVAN TO TOUR EASTERN CANADA

The Wally Byam Caravan this month is off on another grand tour, this time to Eastern Canada. Thanks to arrangements with the Canadian Tourist Bureau and the usual trail-blazing by Wally Byam's scouts, the present Caravan promises to be a real Fifth Avenue tour abroad—but at Woolworth prices.

Starting at Sault St. Marie, Michigan, at the end of June, the Caravanners' itinerary includes Ottawa, Ontario, July 1-8; Quebec City, July 9-15; Gaspe Peninsula, July 15-19; Newcastle, New Brunswick, July 20-26, Moncton, New Brunswick, July 27-August 4; Lunenburg, Nova Scotia, August 5-13; and ending at Bangor, Maine, about August 15.

Luck seems to be with Wally Byam's Caravan as usual—the trailerists will be able to join in some of Canada's most colorful and important national celebrations, and the Canadian government is rolling out the red carpet for the wheeled visitors from south of the border.

This year is the 100th anniversary of the Soo Canal, busiest canal of its kind in the world, which has meant a great deal to the United States, making the ore available to steel mills in American industrial regions. The event marks a milestone in U.S.-Canadian relations—so the Caravan's participation in it is most appropriate. Secondly, Canada is observing the 200th anniversary of the expulsion of the Acadians, made famous by Longfellow's poem, "Evangeline." The Acadians have since greatly increased in population, and a big celebration of their "Survival" is scheduled. They are coming from as far away as Louisiana to join in the fun, along with Wally Byam's Caravanners.

Members of the group will find some of the best fishing of their lives in Nova Scotia and big fishing derbys are on the Caravan's schedule, along with lobster bakes, a whaling schooner trip and other attractions. Quebec is having some important religious festivals this year, too, and the Caravan will reach that city in time to join in.

Best news of all for many veteran Caravanners on this trip is the fact that the roads and bridges have all been found so good that for once the Caravan is able to dispense with its customary tow truck.
