

Location: Tiffany RV Park, Mesa, AZ

Date: 7 July 2015

We went to Brian & Kim's this morning about 8:30 AM. I printed a few pages of this diary to get it up to date. Then I went to Camping World to get a few things, primarily the leveling blocks I lost during the caravan. We had a great tri-tip dinner and later after America's Got Talent Brian, Doris and I cooled off in the pool. We stopped to top off the fuel tanks on the way back to the trailer. Andy is feeling better and wanted to stay at Brian's.

Location: Campbell Cove RV Pk., Lk. Havasu City, AZ Date: 8 July 2015

Departed: Mesa 10:00 AM

Arrived: 2:30 PM

Miles: 219

We had breakfast in IHOP with Kim and Brian near our RV Park. We made the trip with two stops one being a lunch stop at the Burger King in Parker. After arrival we went to Dewey and Judy's house for an afternoon and evening of conversation. We enjoyed a pizza from Papa Johns for supper.

Location: Campbell Cove RV Park, Lk. Havasu City      Date: 9 July 2015

We went to Helen & Tommy's house this morning after emptying the tanks and a brief stop at K Mart. We watched TV and talked for most of the morning. We had snacks for lunch then cooled off in the pool for most of the afternoon. Dewey and Judy stopped by for a while. This evening we invited Dewey and Judy to join Tommy, Helen and us for diner at Chili's. We had a great time and good food. TD and Kathy were visiting Helen and Tommy to enjoy boating on the lake.

Location: Tonopah Station RV Pk., Tonopah NV      Date: 10 June 2015

Departed: Lake Havasu 07:45 AM      Arrived: 6:00 PM      Miles: 381

We made a fuel stop where 93 junctions with 10. A navigation error in Needles cost about 20 minutes. We continue on to lunch stop in Indian Springs, NV. I decided I could make Hawthorne so we didn't stop in Beatty. In Tonopah Doris wanted a milkshake so we stopped at Burger King they didn't have milkshakes but we discovered the curb side rear tire was flat and had been so for some time as the tread was separated and wrapped around the axel. I had just joined Good Sam roadside service for this trip and called them because I didn't see how I was going to get the tread unwound. The service man arrived and looked it over and managed to get the tread out without damaging anything. The loose tread damaged some sheet metal behind the wheel well. We found a place to park at the Tonopah Station RV Park.

Location: Home, Minden NV

Date: 11 July 2015

Departed: Tonopah 8:30 AM

Arrived: 1:15 PM

Miles: 227

I decided this morning that I should buy a tire for the spare on the trailer. However the tire store was closed. It was an uneventful trip home. Although I made a few stops to check on the spare tire that was on the axle end that had suffered the tread separation. I was concerned that there was some damage there that wasn't visible.
